PROFESSIONAL EXPERIENCE

Infodec S.A

May 2024 - Currently

Fullstack Developer

I work as a fullstack developer. In charge of utilizing Laravel and PHP 8 to develop robust payment gateways, ensuring secure and efficient transaction handling. With a keen eye for user experience, I employ Angular to create intuitive payment forms that enhance customer interaction. Additionally, I leverage the power of .NET 8 to engineer background tasks that streamline operations and improve system performance.

BIOART S.A

April 2023 - April 2024

Fullstack Developer Intern

I work as an IT support and fullstack web developer. In my stay here I have been able to develop two fullstack projects using React.js , Node.js and MYSQL. Being the only developer in the company my job is to create designs, documentation and develop the frontend, backend, and create the database. deploying the project on a VPS. These projects have helped to improve and optimize the processes in the company

Innovatech Occidente

April 2023 - Oct 2023

Product owner/ Fullstack Developer (Part time)

I worked as a leader and developer for an E-commerce divided into three applications. Web which was made with Laravel, Bootstrap, HTML, CSS and JavaScript, Desktop made with Java and JavaFX and Mobile which was made with Flutter. I had the opportunity to develop different fullstacks modules for web and desktop. In these project we used the SCRUM methodology with a group of 20 people which I was leader and P.O.
